ABOUT ME

I am an Information Technology undergraduate at SLIIT with a strong interest in full-stack development and UI design. I enjoy creating responsive, user-friendly interfaces and building reusable UI components that improve user experience. I have experience with JavaScript, React, Java, HTML, CSS, PHP, C, and C++, and I am passionate about turning ideas into practical software solutions. I am always eager to learn new technologies and grow as a developer in the tech industry.

EDUCATION

- | | |
|---|----------------|
| • BSc (HONS) in Information Technology Undergraduate | 2024 - Present |
| • G.C.E. Advanced Level in Sri Lanka (Physical Science)- 3S | 2023 |
| • G.C.E. Ordinary Level in Sri Lanka - Pass | 2019 |

PROJECT EXPERIENCE

UNISPORT SPORTS MANAGEMENT SYSTEM

Full-Stack Project | Feb 2026

GitHub : https://github.com/dilumiattanayake/Uni_Sports/

A modular Express + MongoDB backend for university sports administration, focused on secure user management, role-based access (Admin/Coach/Student), and integrated payment workflows for membership and event fees.

Key Contributions :

- Built a responsive React (Vite, TypeScript, Tailwind CSS) SPA with role-based dashboards for Admin, Coach, and Student.
- Developed secure authentication, user management, and payment APIs using Express, JWT, bcrypt, and role-based authorization.
- Implemented end-to-end payment workflows, including checkout, order creation, transaction management, idempotency, and reconciliation.
- Integrated Axios for API communication, caching, optimistic updates, and server-side validation.

Technologies And Tools

- MERN Stack (MongoDB, Express.js, React, Node.js)
- Mongoose, REST API, React Context API, Git, Postman, Tailwind CSS

Outcome

Delivered a modular, secure, and maintainable sports management platform that streamlined operations and improved transparency for stakeholders.

AW CHEMISTRY CLASS LMS

Full-Stack Project | June 2026

GitHub : <https://github.com/dinujaubeysinghe/AWCHEM>

A chemistry tutoring platform built for a private A/L (Advanced Level) chemistry tutor to manage student enrollment, classes, quizzes, results, and weekly progress tracking, with full Sinhala-language support for local students.

Key Contributions :

- Designed and built AWCHEM, a full-stack tutoring platform (Laravel 13 REST API + React/Vite/Tailwind) with role-based admin/student dashboards and full authentication (registration, email verification, password reset)
- Built admin CRUD modules for students, classes, quizzes, results, and notices, including schedule-conflict validation to prevent overlapping classes and a results-tracking system with unique-constraint integrity
- Designed a student enrollment workflow with confirmation safeguards, and a weekly progress feature for admins to share lecture updates and resource links via a read-only student timeline
- Integrated custom Sinhala typography and branded UI to serve a localized student audience, powered by a decoupled Axios-based API architecture

Technologies And Tools

- Laravel 13, PHP, MySQL, React, Vite, Tailwind CSS v4, REST API, Axios, phpMyAdmin, Git

Outcome

Delivered a role-based tutoring platform that streamlined class management, student tracking, and academic communication for a chemistry tutor.

AW CHEMISTRY CLASS LMS

UI/UX Design Project | Figma | June 2026

Proto : [Click here](#)

A tuition class focused Learning Management System designed to give students and administrators a smooth, organized digital learning experience.

Designed the complete UI/UX from scratch with a clean, modern, role-based interface that simplifies online learning and academic management for chemistry education.

Technologies And Tools

- Figma, UI/UX Design, Wireframing, Prototyping, Web App Design

Outcome

Delivered a modern, visually polished LMS UI/UX design that improved accessibility and usability for both students and administrators, creating a professional digital learning environment for chemistry education.

TECHNICAL SKILLS

Programming Languages : JavaScript, Java, PHP, C, C++, SQL, Kotlin

Frontend : React, HTML5, CSS3, Tailwind CSS

Backend : Laravel, Express.js, Spring Boot

Databases : MongoDB, MySQL

Tools & Platforms : Git/GitHub, Axios, Postman, Figma, VS Code, Eclipse
